The 2004 Georgia High School Report Card for Parents

Overview

The Georgia Public Policy Foundation's *Report Card for Parents* is primarily designed to give parents information about their schools. It also provides valuable information for discussions that will help parents make informed decisions about the quality of public education in Georgia.

The testing and evaluation of Georgia's children generates an enormous amount of statistical data. The *Report Card for Parents* transforms this mountain of data into an understandable ranking of Georgia's public schools. The *High School Report* is a numerical ranking of 361 public schools.

The primary measure of student achievement for this report is the average of 1) the percentage of students in the school that attain a Pass or Pass Plus score in English Language Arts and 2) the percentage of students in the school that attain a Pass or Pass Plus score in math on the Georgia High School Graduation Test (GHSGT).

Also provided for information purposes is each school's average Scholastic Assessment Test (SAT) results based on each student's most recent score.

The percentage of students passing the GHSGT is an indicator of how well each school is preparing all students in basic skills. The Pass Plus distinction is meant to challenge all Georgia high school students to "be the best" through the addition of a higher standard against which students, schools and systems can measure their performance. SAT scores are important as a predictor of success in college-level work and because these scores are routinely used nationally to rank students' academic achievement.

Because there is a strong link between poverty and test scores (the higher the poverty rate, the lower the test scores), the report includes two other criteria *for information purposes only*.

The first is the poverty rate—the percentage of students in each school who qualify for the federal free/reduced-price lunch program. The second is a poverty index that measures how well a school is performing relative to its poverty rate. All information in the report is from the 2002–2003 school year.

Adequate Yearly Progress, or AYP, is one of the cornerstones of the federal *No Child Left Behind Act* (NCLB). It is a measure of year-to-year student achievement on statewide assessments. Under NCLB all students must meet AYP. One category of students, for example, students with limited English proficiency (LEP), that does not meet standards can cause a school to not meet AYP. For more details see <http://www.doe.k12.ga.us/support/plan/nclb.asp>.

 is available for Elementary,
 Middle and High School

How Parents Can Use This Report

To judge the quality of their children's schools, parents must have quality information about academic performance. Student achievement is the touchstone for evaluating the success of all education efforts. To improve public education for all students we must know whether students are progressing every year. For the vast majority of parents, assessing the quality of a school can often be a difficult task with unfamiliar terms and voluminous data. This report serves to provide parents with the simple facts which will aid in the assessment of the education received by their children. In this *Report Card*, schools are ranked by clear, objective results, and parents are presented with a statistically reliable, annual measurement of student progress.

It is important to remember that many factors affect a school's performance. Any questions or concerns arising from this report should first be discussed with teachers, principals and local school board members before drawing definitive conclusions.

We believe parents should become actively involved in their schools and resist being passive, uninformed consumers. The information in this report should be used to open a dialogue between parents, teachers, administrators, elected officials and civic organizations.

For more detailed information, contact:

- Your school
- Georgia Department of Education at (404) 656-2800
- The Governor's Office of Student Achievement at (404) 463-1150
- Georgia Public Policy Foundation at (404) 256-4050

“... every school in order to be effective needs a specific, coherent, and well-conceived curriculum, plus sound tests that indicate how well that curriculum has been taught and learned.”

E. D. Hirsch, Jr.
Professor of Education and
Humanities, University of Virginia
Core Knowledge Foundation

Definition of Terms

Achievement Score. Average of 1) the percentage of students in the school that attain a Pass or Pass Plus score in English Language Arts and 2) the percentage of students in the school that attain a Pass or Pass Plus score in math on the Georgia High School Graduation Test.

Poverty Rate. The percentage of students eligible to receive free/reduced-price lunch provides an indicator of the poverty level of the students attending the school.

Poverty Index. Measures how well a school is performing relative to its poverty rate. A score above zero indicates better than expected performance, below zero indicates lower than expected performance, and zero indicates that the school is performing as expected.

High Poverty Schools (P). This school’s poverty rate is significantly higher than the average for high schools in the state of Georgia. Schools with poverty rates higher than 61 percent received this designation. Significance was determined mathematically using one standard deviation as the benchmark.

High Limited English Proficiency Schools (L). This school’s percentage of students with low English proficiency is significantly higher than the average for high schools in the state of Georgia. Schools with a percentage of students with low English proficiency higher than 7 percent received this designation. Significance was determined mathematically using one standard deviation as the benchmark.

High Disability Schools (D). This school’s percentage of students with disabilities is significantly higher than the average for high schools in the state of Georgia. Schools with a percentage of students with disabilities higher than 15 percent received this designation. Significance was determined mathematically using one standard deviation as the benchmark.

State Rank. The rank is determined by the Achievement Score. The % Pass Plus serves as a tiebreaker. If both of these criteria are equal, there is a tie and the schools are listed with equal rank in alphabetical order by school name.

Low: 8

Additional Information

▶ How should I interpret the ranking?

There are several ways to evaluate your school's ranking. First, look at the school's progress over time. Is the school improving or declining? Second, compare your school to other schools of similar size and poverty percentage. Finally, there is no substitute for personally visiting schools and talking to teachers, administrators, parents and students.

▶ How can I access additional information about my school?

All of the data in our reports, as well as much more data that could not be included in the reports, is available on our Web site (www.gppf.org) The Web site contains new and expanded features such as comparison reports, geographic searches and interactive queries. *Additional information includes district spending per pupil, enrollment, all test subjects and data disaggregated by gender, race/ethnicity, limited English proficiency, disability and socioeconomic status.*

▶ Why was my school not listed in this report?

In order to be included in this report, a school must have 2004 testing data for the 4th, 8th or 11th grade. For example, a school that just began operation this fall would not be included.

▶ Why is some information not available for my school?

Missing data may result if the school were unable to administer the test or if fewer than 10 students participated in the test.

▶ Why do we focus on test scores?

To improve public education for all students, we must know whether students are learning every year. Well-made tests are an analytical tool, enabling teachers to diagnose students' weaknesses and strengths, and parents to monitor the achievement gains of their children.

Notes on the Student Data

- Data was provided by the Office of Student Achievement, the Georgia Department of Education and the National Center for Education Statistics.
- "All Students" refers to all students who were tested.
- Test results for less than 10 students are not reported.
- Poverty rate is reported as the percentage of students eligible to receive free- or reduced-price lunches. This percentage is calculated by dividing the number of eligible students (as reported to the Department of Education in October 2003) by the total school enrollment (as reported by the October 2003 FTE count).
- The percentage of students with disabilities is based on the December FTE (full-time equivalency) count divided by the total enrollment from the Fall FTE count. The December FTE has been declared the official count of students with disabilities (special education) since that data collection is used to determine federal funding.
- The percentage of students with limited English proficiency is based on the 2004 Student Record.
- Enrollment represents the October 2003 FTE count.

Highest Ranking Schools

Elementary Schools

1	DeKalb County	Kittredge Magnet School
2	Muscogee County	Rigdon Road Elementary School
3	Dougherty County	Lincoln Elementary Magnet
4	DeKalb County	Vanderlyn Elementary School
5	Muscogee County	Britt David Elementary
6	Forsyth County	Settles Bridge Elementary School
7	Gwinnett County	Riverside Elementary School
8	Fulton County	Barnwell Elementary School
9	Rockdale County	Lorraine Elementary School
10	Fulton County	Sweet Apple Elementary School
11	Fulton County	Shakerag Elementary School
12	Fulton County	Summit Hill Elementary
13	Atlanta City	Jackson Elementary School
14	Forsyth County	Big Creek Elementary School
15	Fayette County	Peoples Elementary School

Middle Schools

1	Richmond County	Walker Traditional Elementary
2	Richmond County	Davidson Magnet School
3	Dougherty County	Robert A. Cross Middle Magnet
4	Cobb County	Hightower Trail Middle School
5	Fulton County	Fulton Science Academy
6	Cobb County	Dodgen Middle School
7	Fulton County	River Trail Middle School
8	Cobb County	Dickerson Middle School
9	Gwinnett County	Alton C. Crews Middle School
10	Fulton County	Webb Bridge Middle School
11	Ware County	Ware Magnet School
12	Trion City	Trion Middle School
13	Forsyth County	South Forsyth Middle School
14	Fulton County	Northwestern Middle School
15	Fayette County	Rising Starr Middle School

High Schools

1	Muscogee County	Columbus High School
1	Richmond County	Davidson Magnet School
3	Richmond County	Johnson Magnet
4	Fulton County	Fulton County Charter H.S. for Math. and Science
5	Chatham County	Savannah Arts Academy
6	Ware County	Ware Magnet School
7	DeKalb County	DeKalb School of the Arts
8	Fulton County	Northview High School
9	Cherokee County	Sequoyah High School
10	Cobb County	Walton High School
11	Fayette County	Starrs Mill High School
12	Cobb County	Pope High School
13	Fulton County	Chattahoochee High School
14	Floyd County	Pepperell High School
15	Fayette County	Fayette County High School
